

Professional Certification:

A recent addition that should be included on the plan.... the MD Board of Professional Licensing has been requiring a Professional Certification which should be placed adjacent to the Professional's seal on the plan

"The Engineers Board and the Architects Board have provisions in their regulations requiring that all plans, documents, reports, etc. signed and sealed by a licensee must contain a "professional certification", which states that the documents were prepared by the licensee and contains the license number and expiration date of the license. The certification ensures that the licensee is aware of the expiration date of the license."

An example of this professional certification is below:

<p>Professional Certification.</p> <p>"I hereby certify that these documents were prepared or approved by me, and that I am a duly licensed professional engineer under the laws of the State of Maryland, License No. <u>22852</u>, Expiration Date: <u>1/13/2014</u>."</p>
